

**Project Summary:**

A cycle route near an urban area such as the one in the municipality of Limite sull'Arno required particularly effective and at the same time reassuring illumination to allow cyclists to enjoy the route in the evenings also.

Data:

For this project, 80 Ledway Street luminaires were installed, each with 20 LEDs (1 bar). The Ledway Street devices were installed on 4m poles at an interdistance of 24 metres. The PR asymmetric optics system was used. The cycling track is 2.5m wide.

Project Values:

Average luminance = 6 lux;

Reference category S3 downgraded to Project Category S4.
